

Better water means better living.

Aquasential™ Select Plus Series™ Sulfur-OX3® Water Filter

SYSTEM BENEFITS

- Reduces "rotten egg" smell caused by hydrogen sulfide in your water
- Prevents black spots on laundry and fixtures
- Uses the natural process of oxidation
- An environmentally-friendly filter system that uses no chemicals
- Protects plumbing from corrosive effects of hydrogen sulfide
- Increases life of appliances and fixtures
- Quiet operation

Environmentally-friendly sulfur removal solution.

The Sulfur-OX3® was specifically designed to efficiently and effectively remove moderate levels of sulfur. Also known as hydrogen sulfide – it is responsible for that rotten egg smell from your water as well as black spots on laundry and fixtures.

Culligan® has guaranteed solutions to these and other water problems you may have. All Culligan filters are customized to handle your specific type of problem water.

The Aquasential Select Plus Series Sulfur-OX3 Water Filter is the simple and affordable way to give you cleaner, safer water and more peace of mind.

Product Specifications

Natural Aeration Technology:

- The key to the chemical-free Sulfur-OX3® system is the aeration process which oxidizes hydrogen sulfide to a filterable state without the need for any chemicals.
- The Sulfur-OX3 system automatically keeps the aeration process active in a simple single tank design.
- The included bypass valve provides the convenience of bypassing the water filter if needed.
- Exclusive Culligan Soft-Minder® meter monitors and records daily water use and the electronic circuit board retains regeneration data.
- The easy to read back-lit display with digital clock lets you know your filter is working and warns of system malfunctions.

Exclusive reliable design:

- Exclusive, non-corrosive valve. The motor-driven pistons provide a high level of performance and reliability in problem water applications.
- System includes inlet and air line check valves and a stainless steel strainer on the air intake.
- Sturdy fiberglass media tank with filament-wound exterior, and smooth, non-permeable inner tank shell designed for years of continual service.

Unique Media Filter

The Cullar-S media used in the Sulfur-OX3 filter is a catalytic activated carbon designed to enhance the reaction between the oxygen and hydrogen sulfide resulting in efficient reduction.

Chemical-Free

Requires no chemicals for operation or reconditioning. Oxygen is automatically drawn into the tank during the regeneration cycle to replenish the air level to naturally clean your water.

Know your water quality

Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Ask your local Culligan dealer about available water testing options. The Culligan Analytical Laboratory offers a wide range of test panels for most any water problem.

System Dimensions

Size	Service Flow	Media	Control Valve	A	B	C
10"	4 gpm @ 1 ppm Hydrogen Sulfide	Cullar-S Catalytic Carbon	1"	10"	54"	69"
